

Service technician shipping industry (m/f/d)

Do you want to take new technologies to the next level and help shaping sustainable and system-relevant projects for the future?

Then become part of our Turbo-Technik team!

We are looking for you as a **service technician in the shipping industry (m/f/d)** as soon as possible.

Turbo-Technik is a family-owned company that offers exciting tasks and challenges for trainees, students and graduates as well as for experienced specialists and managers. We challenge, encourage and recognise performance. As a team, we support each other for everyone's success and are a "hands-on" family. We stand for flat hierarchies and short decision-making processes.

In addition to our locations in Rostock and Hamburg, our main headquarters and workshops are located in Wilhelmshaven, Germany.

Your task

- Independently carried out maintenance, servicing and repair work on seagoing vessels during vessel being in service and / or at shipyard
- Preparing repair and solution approaches on the basis of vessel inspections

Your Benefit

- A fair and open corporate culture in a professional and international environment
- A young, innovative and motivated team as well as short decision-making processes

- Planning spare part requirements in line with customer's requirements
- Leading installation teams
- Coordination of scope of work with the customer
- Communication between shipping company, shipyard and crew
- Preparing technical / acceptance documentation
- An interesting and challenging position in a dynamically growing company
- The opportunity to actively shape our further growth with commitment and responsibility
- Appropriate remuneration (IG Metall), 30 days' holiday and opportunities for professional and personal development

Your profile

- Ship mechanic, industrial or construction mechanic or comparable training with professional experience in the shipping sector
- Good communication and teamwork skills
- Customer-oriented service mindset
Independent, structured and solution-oriented way of working
- Team player with a confident manner and a high level of quality and safety awareness
- Willingness to assemble and travel
- Written and spoken English

Challenge accepted?

Then we look forward to getting to know you.

About TURBO-TECHNIK

Founded in 1967 in Wilhelmshaven, Germany, the family-owned company Turbo-Technik originated as a ship repair company for voyage and port repairs of seagoing vessels and today specialises in the repair of merchant vessels, from worldwide voyage and port repairs to conversions, after-sales services for large ship equipment as well as spare parts supply. In addition, we carry out repairs and maintenance of naval vessels as well as technical upgrades and modernisations of all kinds of ships worldwide. Another strong market segment of Turbo-Technik is the service, repair and construction of industrial, petrochemical and regenerative energy plants. In the industrial sector, we also offer engineering services, the construction of modules as well as steel construction and contract manufacturing.
