

Project manager/project engineer for ship operations technology and mechanical engineering (m/f/d)

Do you want to take new technologies to the next level and help shaping sustainable and system-relevant projects for the future?

Then become part of our Turbo-Technik team!

We are looking for **project engineers** for our headquarter in **Wilhelmshaven** as well as for our offices in **Hamburg** and **Rostock**.

Turbo-Technik is a family-owned company that offers exciting tasks and challenges for trainees, students and graduates as well as for experienced specialists and managers. We challenge, encourage and recognise performance. As a team, we support each other for everyone's success and are a "hands-on" family. We stand for flat hierarchies and short decision-making processes.

In addition to our locations in Rostock and Hamburg, our main headquarters and workshops are located in Wilhelmshaven, Germany.

Your task

- Coordination, control and implementation of worldwide repair, maintenance, conversion and new building projects

Your Benefit

- A fair and open corporate culture in a professional and international environment

- Carrying out ship inspections and conceptualizing possible repair and solution approaches
- Preparation and review of technical specifications and installation concepts
- Preparation of cost calculations and quotations
- Obtaining and evaluating external supplies and services
- Customer support during the project phase and in the course of project implementation
- Preparation of technical drawings and project documentation
- Communication and reporting with and to the division management
- A young, innovative and motivated team as well as short decision-making processes
- An interesting and challenging position in a dynamically growing company
- The opportunity to actively shape our further growth with commitment and responsibility
- Appropriate remuneration (IG Metall), 30 days holiday and opportunities for professional and personal development

Your profile

- Ship operation or mechanical engineer, state-certified technician in mechanical engineering or comparable training with professional experience as a manager
- Good communication and teamwork skills
- Customer-oriented service mindset
- Confident appearance, negotiating skills and assertiveness
- Willingness to work and travel
- Sound knowledge of industry-specific class regulations and general rules of technology
- Confident handling of Microsoft Office
- Experience with CAD software desirable, but not necessary
- Fluent written and spoken English

Challenge accepted?

Then we look forward to getting to know you.

Please use the "Apply now" button below. Thank you very much!

About TURBO-TECHNIK

Founded in 1967 in Wilhelmshaven, Germany, the family-owned company Turbo-Technik originated as a ship repair company for voyage and port repairs of seagoing vessels and today specialises in the repair of merchant vessels, from worldwide voyage and port repairs to conversions, after-sales services for large ship equipment as well as spare parts supply. In addition, we carry out repairs and maintenance of naval vessels as well as technical upgrades and modernisations of all kinds of ships worldwide. Another strong market segment of Turbo-Technik is the service, repair and construction of industrial, petrochemical and regenerative energy plants. In the industrial sector, we also offer engineering services, the construction of modules as well as steel construction and contract manufacturing.
